SalesAi

Sales Conversation Guide

Home Services ICP • $1M–50M Revenue • April 2026 • Internal Use Only

Demo line: 463-220-4953 (Sarah) • Use this on every call

1. WHO WE ARE AND WHAT WE SAY

Positioning Statement

SalesAi is the only fully managed AI CSR team built for home service companies doing $1M–50M. We answer every call, qualify every lead, book every job, follow up on every unsold estimate, and run the entire system for you.

One-Line Pitch

SalesAi is a fully managed AI CSR team — we build it, integrate it with your ServiceTitan or Housecall Pro, run it daily, and optimize it monthly. You don't consider yourself onboarded until you've hit real revenue milestones. You don't pay for a features list — you pay for outcomes.

Our Strongest Differentiator — say this often:

"We don't consider you onboarded until you hit your first real business outcome."

No competitor makes this commitment. Not Hatch, not Cactus, not ServiceTitan. This belongs at the top of every sales conversation.

Owned term: Agent-as-a-Service. This is SalesAi's branded delivery model. Use it to describe how we work. It cannot be confused with any competitor.

Tagline: "Win the moments that matter." Use as the through-line in all customer-facing conversations.

Campaign line: "We Build It. We Run It. You Book the Jobs." Use this when explaining the managed model quickly.

2. LANGUAGE AND TERMINOLOGY

Say This	Not This
Jobs booked	Leads converted, pipeline, conversion
Your shop, your crew, your techs	Your workforce, your technicians, your staff
AI CSR (for $3M+ companies with CSRs)	Bots, chatbots, robocalls, AI software

AI voice agent or 'Sarah' (for $1M–3M, no CSR team)	Platform, tool, system
Fill the board, book more jobs	Drive revenue, increase conversion
Homeowners, callers	End users, prospects, clients
Humans in the loop	Fully automated, no human involvement
We run it for you	Set it and forget it

Terminology rule by company size:

$1M–3M (no existing CSR team): Use 'AI voice agent' or call her 'Sarah.' These owners relate to a person answering the phone, not a CSR role they don't yet have.

$3M–50M (existing CSR team): Use 'your AI CSR' freely. These buyers already think in CSR terms and understand augmentation immediately.

Banned words — never use these:

revolutionary • game-changing • unprecedented • transform / disrupt • cutting-edge • paradigm-shifting • bots • chatbots • robocalls • effortless • magic • cold calling • no-brainer

3. PRICING

	Managed-Lite	Managed
Price	$1,500/mo	$2,250/mo
AI CSRs included	Up to 3 fully managed	Up to 5 fully managed
Voice minutes	3,000 included	5,000 included
Coverage	24/7 + after-hours	24/7 + after-hours
Live transfer	Urgent calls	Urgent calls
Outbound campaigns	Not included	Seasonal + reactivation
Agent tuning	Monthly	Weekly
Integrations	Managed (we handle it)	Managed (we handle it)
Autonomous booking	Yes	Yes
Contract	1-year	1-year
Who runs it	SalesAi team	SalesAi team

Pricing is all-inclusive. No usage fees, no variable billing, no surprises.

The prospect never has to do math. One number, everything included, managed by our team.

4. COMPETITIVE BATTLECARDS

Hatch

Hatch is a real competitor with 2,000+ customers and strong case studies. Do not dismiss them. Win on three things they cannot credibly claim.

What Hatch claims	What you say
AI CSR platform across voice, SMS, email	Hatch is software you configure yourself. When something breaks or the AI gets something wrong, you wait on support or fix the prompts. We manage everything for you.
81% lead booking rate (case study)	Their case studies are real — but 28% of their reviews are 1-star, almost all about support delays and AI reliability. We built our managed model specifically to solve that problem.
Deep ServiceTitan integration	We integrate with ServiceTitan too — and we set it up, run it, and tune it for you. You never touch the configuration.
Annual contract standard	Same structure as us. But with Hatch, you're managing the system yourself inside that contract.

Hatch battlecard close:
"Don't sell against Hatch directly. Ask: 'Walk me through a typical week with Hatch. What's working? What are you still handling manually?' The answers will almost always surface: support delays, something the AI got wrong, a config change they've been waiting on. Each of those is a SalesAi sale."

Cactus

YC-backed, $7M raised, running $500/mo Meta ads actively targeting your same buyers. Their starter tier is inbound-only with no outbound, no dashboard, no follow-up. They have 4 employees custom-building every agent by hand.

When a prospect brings up Cactus's $500 price:
"Cactus's $500 tier is an inbound answering service with one agent and no outbound. SalesAi Managed-Lite is $1,500 — three fully managed AI CSRs, 24/7 coverage, live emergency transfers, and we handle everything including integrations and monthly tuning. The $1,000 difference covers the cost of the team that makes it actually work for your business."

When Cactus comes up in conversation:
"We demoed Cactus. They have 4 people and they custom-build every agent by hand. That might work at 20 customers. At 100 or 500, how does that scale? SalesAi has built a system that works across hundreds of home service companies. Ask them what happens to your agent when their team is stretched thin."

Nonstop Automation

GHL-based marketing agency rebranded as a platform. Their Starter package ($2,750/mo) still requires the office to confirm bookings manually. Usage fees add $150–$600/mo on top of the base price. No outcome commitment.

Nonstop claim	Your counter
No contract, cancel anytime	Cancel-anytime means they have no stake in whether it works after month one. Our 1-year structure exists because we invest in your integration and account management. We have more to lose if it doesn't work than you do.

14-day go-live	That speed is only possible with template workflows, not deep integrations. Ask them: what happens when your service area changes, or you need a customization their template doesn't cover?
Starter at $2,750/mo	Add $0.15/minute on every answered call. Walk through the math with them: [monthly call volume] x [avg call length] x $0.15 = real monthly cost. SalesAi is all-inclusive.
Atlas base confirms bookings autonomously	Their base model queues appointment requests for your office to confirm. SalesAi books autonomously. Ask them which tier removes humans from the booking step — and what that upgrade costs.

Nonstop pricing math to do with the prospect:
SalesAi Managed-Lite at $1,500/mo is $1,250/mo cheaper than Nonstop's Starter before usage fees — fully managed, all-inclusive, no variable billing. Do not concede on price when Nonstop is in the conversation. SalesAi wins on cost once the usage fee math is done.

ServiceTitan / Housecall Pro / Jobber Native AI

When they say 'Our ServiceTitan already does this':
"The FSM platforms built an AI feature. SalesAi built an AI business. Their AI answers calls. SalesAi answers calls, follows up on every unsold estimate, runs outbound campaigns, and has a team that manages the whole thing for you. They ship a feature. We ship outcomes. If their native AI was good enough, you wouldn't be talking to us."

5. OBJECTION HANDLING

Objection	What to say
"My customers want to talk to a real person."	The question isn't AI vs. human — it's AI vs. voicemail. In most cases they're already getting voicemail, a distracted CSR on two other calls, or nothing at 9pm Sunday. Call 463-220-4953 right now. That's Sarah. She doesn't have bad days. She doesn't put someone on hold at 9pm. One-liner: "Your customers aren't asking for a human. They're asking for someone who picks up. Sarah picks up."
"I already tried something like this."	There are two products in this category: software you manage yourself, and a managed service where we run everything. You tried a software platform that put you in charge of making it work. We're not that. One-liner: "You didn't try SalesAi. You tried a software platform that put you in charge of making it work. We're not that."
"I can't afford it."	Walk them through the math. Industry average: 27% of inbound calls go unanswered. At $1,200 per missed call and 8 missed calls a week, that's $9,600/week leaving through the back door. $1,500/mo to stop that isn't a cost. One-liner: "$1,500 a month to stop losing $4,800 a week isn't a cost. It's the best trade you'll make this year."
"I don't want a one-year contract."	Cancel-anytime means the vendor has nothing at stake if it doesn't work after month one. SalesAi's loss if you cancel early is an account manager's time, an integration build, and our reputation. We have more to lose than you do if this doesn't work.

	One-liner: “Cancel-anytime means they have nothing at stake if it doesn’t work. We’re accountable to your outcomes for a year. That’s different.”
“We already have a CSR team.”	SalesAi doesn’t replace your CSRs — it handles the 40th routine booking call, the 9pm overflow, and every call that comes in while your CSRs are already on the phone. Your humans focus on the complex conversations, the upsells, and the relationships. One-liner: “Your CSRs don’t want to answer the 40th routine booking call any more than you want them to. SalesAi takes that call. They take the ones that matter.”
“We’re not ready for AI.”	41% of home service bookings come in after hours (Housecall Pro, 2026). Is your team answering those calls? The best companies in your market are already using AI CSRs to win jobs you’re sending to voicemail. Setup to live in hours, not weeks — and humans in the loop every step of the way.

6. STATS THAT LAND IN A SALES CONVERSATION

Stat	How to use it
41% of home service bookings come in after hours (Housecall Pro, 2026)	Lead with this when they say ‘we’re usually available.’ Is your team available at 1am? That’s when 41% of the work is.
Less than 3% of callers who reach voicemail leave a message (Invoca)	Use in final conversations or when they assume voicemail covers missed calls. ‘97% of people who hit your voicemail just called your competitor.’
27% of inbound calls to home service businesses go unanswered (Invoca)	Quantify the invisible loss. ‘You’re not seeing those missed calls on your P&L. They just disappear.’
$1,200 average revenue per missed call in home services (Invoca)	Use with the math objection. Multiply by their missed call estimate to make the loss concrete.
78% of jobs go to the company that responds first	Use when discussing competitors. ‘Your competitor isn’t better than you. They just picked up.’

7. THE DEMO AND HOW TO CLOSE

The single most powerful sales asset: 463-220-4953

Tell every prospect to call this number before or during the conversation. That’s Sarah, our AI CSR. 90 seconds on that call does more selling than 30 minutes of explanation. If they call and it sounds like a real person, the objection ‘AI will hurt my customer relationships’ dies on the spot.

Buyer type	How to close
Owner who just had the moment($1M–5M, 3–10 day close)	Get them to call 463-220-4953 first. Then walk through one real call example. The contract question is the only remaining objection — reframe it as accountability, not lock-in.

Reluctant Pragmatist after peak season($3M–15M, 7–21 day close)	Lead with a trade-specific proof point. Confirm ServiceTitan or HCP integration upfront — if clean, they close. Ask: ‘What did peak season look like this year for your CSR team?’
Structured Operator with CSR team($10M–30M, 30–90 day close)	Frame as pipeline recovery, not call answering. ‘How many unsold estimates are sitting in your ServiceTitan right now?’ Bring the CSR manager into the conversation and position SalesAi as making their job easier, not threatened.
Skeptical Researcher($1M–5M, 30–60 day close)	Call the demo number together on the call. Offer a reference customer in their trade. Be specific about the managed model: who is their account manager, how many accounts do they manage, what happens if something breaks at 3am.

Never buys — stop spending time here:

Ideological Rejecter: ‘I built this on personal relationships and AI will destroy that.’ Evidence won’t move them. Exit the conversation.

Exit-Bound Operator: Actively preparing for a PE sale in 12–18 months. Doesn’t want new contracts or operational change. Wrong timing.
