Humanizing Ai

We believe the future of business isn't Ai versus people — it's A *with* people. We're building Ai agents that don't just automate, but collaborate — giving teams the freedom to focus on high-value human moments while Ai handles the rest.

We're humanizin Ai by making it feel like a natural extension of your team — trained, contextual, and always on. Because real connection still matters. And when Ai meets the human touch, teams gets smarter, faster, and more personal.

Our Brand

Our Brand Voice

At SalesAi, we speak the way our product works: fast, focused, and human-like. Our voice is:

- **Conversational**, not corporate
- **Confident**, without being arrogant
- **Clear**, especially when talking about Ai
- Ai-forward, always leaning into **innovation** and the future of automation

We aim to sound like the most capable person in the room, who also happens to be your favorite to work with.

Mission

Make Ai incredibly simple, easy and effective for businesses to use

Now for the technical stuff..

Logos

Always use the full SalesAi logo or the standalone icon depending on the space and context. The full logo helps drive brand awareness, especially in co-marketing or new audience campaigns.

Best Placements:

- Full logo: Use on hero graphics, email headers, slide decks, and social tiles.
- Icon only: Ideal for smaller placements—favicons, footers, profile photos, or watermark-style branding.

Typography

Our Font of Choice:

- Headers: Roboto Bold
- Body/Subtext: Roboto Regular or Light

How to Use It:

- Headers: Use bold, clean headers for clarity and energy.
- Subtext: Use regular/light weights for clarity. Supportive, not overpowering.

Need a web-safe fallback? Use Arial or Helvetica if Roboto isn't available.

Colors

Primary Colors:

- Bright Green: #3ede6f – our hero color. Use for buttons, CTAs, highlights.
- Dark Background: #0a0c10
Best for full-bleed backgrounds, footers, or dark mode.
- White: For contrast and clarity.

Supporting Accents: Light grays and soft blues can be used sparingly.

SalesAi not SalesAI

At SalesAi, we always use a lowercase "i" when referencing Ai in our name. It's not a typo.

- ✓ SalesAi
- ✗ SalesAI, SALESai, Sales AI, Sales Ai

Why? Because we believe Ai should feel integrated, approachable, and human, not like a shouting acronym. Plus, it stands out better, which means better marketing.

This small detail reflects our belief that Ai should work with you, not above you.
